The layout and pace of this course was optimal for learning. I also

liked that we had a choice in how we presented certain assignments and were encouraged to think outside the box. The content of the course couldn't have been more timely and helpful. I would suggest that an iteration of this course be presented to students in the K-12 LIFTS program as well, even if it is 1 credit. I also think this course would be great as a three credit course, since there is so much relevant content and reading. Loved it!

I really enjoy discussion boards in distance learning classes and would like to see more response/discussion posts, which might mean including more readings that would encourage discussion

Question 12: Short Answer

In a few words describe a feature or component of the course that you did not like and would recommend eliminating. Giving a reason for your opinion will be very helpful.

Re-organize the course and eliminate the broken links -- adapt assignments with new, modern videos or materials

I appreciate the convenience of online classes, however, as a traditional student, I would have appreciated one or two Saturday classes.
